

AREEB AMIR

Full Stack Web Developer (MERN / Next.js)

Karachi, Pakistan

+92-317-1232544

areebamir.pik@gmail.com

<http://portfolio-areeb.vercel.app>

SUMMARY:

Aspiring full stack web developer specializing in MERN and NextJS. Hands on experience in building scalable websites with modern UI/UX using tailwind, shadCN etc. Eager to find an internship role to contribute to real world products and grow as a professional developer.

SKILLS

- | | |
|--------------------------|-----------------------------|
| ✓ HTML, CSS, JavaScript | ✓ Node.js, API Routes |
| ✓ React | ✓ MongoDB, MySQL |
| ✓ Tailwind CSS, ShadCN | ✓ Mongoose |
| ✓ Responsive UI / UX | ✓ Authentication (JWT, 2FA) |
| ✓ Git & GitHub | ✓ Deployment |
| ✓ Redux persist/TanStack | |

EDUCATION:

2022 - 2026 (Final Semester) | Dawood University of Engineering & Technology
Bachelor of Computer Science

CGPA 3.2 /4.0

PROJECTS:

Eventsora - (Events Marketplace & Bookings Management System)

Next.js, React, MongoDB (Mongoose), Redux Toolkit, TanStack Query, Tailwind, Radix UI, NextAuth.js, Cloudinary, Node.js

- Built a multi-user platform that allows Event service providers to manage both online and offline bookings in one system, while allowing customers to discover and book services.
- Developed a centralized booking system that allows providers to track and manage online and manual (offline) bookings in a single dashboard.
- A Provider dashboard with booking management, Listing performance insights, Payment tracking (Advance, Received, Pending), and account status tracking
- Secure role-based authentication using NextAuth with JWT based session and encrypted passwords
- Integrated Cloudinary for image uploads
- Implemented an interactive Calendar system with multi-slots management.

E-commerce Platform (La Klosette)

Next.js, MongoDB, Tailwind, ShadCN, TanStack, Redux Persist, JWT

- Built a full-stack e-commerce application using Next.js.
- Backend with Next.js API Routes and MongoDB (Mongoose).
- Secure authentication using JWT (jose) and bcryptjs.
- Used Redux Toolkit and optimized server-state fetching with TanStack Query.
- Integrated Cloudinary for optimized image storage/delivery and Nodemailer for transactional emails.
- Built forms with schema validation using React Hook Form and Zod.

Personalized Experience Platform (Valentine)

Next.js, React, Tailwind, Shadcn, JWT Auth, Bcrypt, MongoDB, Cloudinary

- Built a full-stack web application allowing users to create and share personalized interactive experiences (5000+ users).
- Backend built with Next.js API Routes and MongoDB (Mongoose).
- Secure authentication using JWT and bcrypt.
- Integrated Cloudinary for optimized image uploads with WebP conversion (17,000+ images).
- Implemented multi-step creation flows, interactive quizzes, and secure shareable links.

Maxnet Internet Service Provider Portal

Next.js, React, Tailwind, GSAP, Next.js API Routes (Serverless), Node.js, MongoDB.

- Developed a dynamic user interface using Next.js.
- Styled the application by using Tailwind.
- Used GSAP and Framer motion to enhance user engagement.
- Managed form handling and validation using React hook form.

PROFESSIONAL EXPERIENCE:

CXTREME / Cybernet (Authorized Contractor)

Jr. Network Administrator | March 2019 - Present

- Deployed and maintained Cybernet/CXTREME telecommunication infrastructure, including fiber lines and switches.
- Diagnosed and resolved 95% of Wi-Fi and Ethernet connectivity issues reported by users within 24 hours, maintaining 99.9% uptime and boosting user satisfaction.
- Resolved monthly user complaints regarding connectivity and routing. Configured and maintained ONUs, VLANs, and Class C IP distributions.
- Onboarded new users and activated services, contributing to a 45% user base increase over 2 years.

CERTIFICATIONS

- **Web Developer - 2025**
 - Certification from NED Academy
- **Model United Nations (MUN)**
 - Honorary Mention
